

Services and support available for military veterans and their families within the local community

Beacon Service is a social prescribing service offering a person centred service focussing on 'what matters to me' to help individuals improve their health, wellbeing and social welfare by connecting them to community services which might be run by the council or a local charity.

We work in partnership with dedicated local groups, organisations and services for specifically for veterans and that are veteran friendly that will enable individuals to access the best possible support for their health and wellbeing. We ensure we have the most up to date information about groups, activities, services and organisations before we make a referral as we know things change regularly.

We are working in partnership with Whittaker Lane GP Surgery, the first registered veteran friendly GP surgery in Prestwich to ensure we offer military veterans and their families throughout Bury the best possible support for their health and wellbeing through our social prescribing service.

For more information or to access our service please email buccg.beaconservice@nhs.net
